## See What Your Website Looks Like On a Mobile Phone

Enter your URL below and click MY SITE ON MOBILE button...

### Look at Your Site and Ask Yourself these 10 Questions:

1. How long did it take to load? If it takes more than 5 seconds to load then that's too long.
2. Is your site's text visible without having to pinch or zoom in?
3. Are the images on your site appearing properly?
4. Could someone with big thumbs easily click on your links and buttons?
5. Do you have to scroll horizontally to read your content (you shouldn't have to)?
6. Is your site easy to navigate? If you have a large site do you have a search box available?
7. Is it easy to find your location? Do you link to a map so mobile users can find you?
8. Is your text easy to read even in places with low light? Or does your site cause eyestrain?
9. Can your site automatically tell if a visitor is using a mobile device or not?
10. Does it look good? Be honest and tell the truth.

## Demo Sites

Here are some live and interactive mobile sites for you to check out.

If you're on a mobile phone right now just click the link to see the mobile website.

These demo mobile sites showcase only a small fraction of the styles and features available in our mobile site service. In addition, custom pages and links can be created to incorporate a wide range of outside content, like YouTube videos, LinkedIn pages, and much more.
