

Optins Income Multiplier VSL (AV Script)

Visuals	Audio
 <div>Captions...</div>	<p>Hi. Dave Aquino here at Base Camp Trading. I want to share with you a unique trading method we've developed that could potentially Turn \$3,000 into \$33,500 by Making 2-3 Simple Trades a Week.</p> <p>I truly believe this is the #1 most effective way to grow a small trading account quickly without taking on too much risk. After being in the market for over 25 years I've seen hundreds of different ways to trade... some better than others.</p> <p>Some I wouldn't touch with a 10 foot pole... others are "ok" but what I'm going to share with you is, hands down the most exciting and effective method I've ever seen for growing small accounts... even if you're a new trader.</p>
<div>THE TWINS GRADUATION</div>  <div>Captions...</div>	<p>Speaking of new traders, this is a picture of my kids who are in college now. The other day my daughter London came into my office and said,</p>

"Dad, can you teach me how to trade?"

Captions...

"Dad, now that I'm in college I realize how hard it is to make money out there in the real world. And I was wondering if you could show me how to make money trading. I don't know if I want to do it full-time like you but it'd be nice to be able to make some money doing it."

Plain text here...

It was one of those proud dad moments, because up until then I don't think my kids even really knew how I made money. They knew I traded but never seemed too interested in it. So it was cool to hear her ask about this.

"I'd feel terrible if my daughter lost money."

However, I also know how risky -- and how hard -- trading can be if you don't have a reliable method to follow. And I would feel terrible if I watched my daughter lose what little money she had saved up trying to learn how to trade.

Plain text here...

So after thinking about all the different things I could teach her, I landed on the same strategy I'm going to share with you today. Because after two and a half decades in the markets...

...this is the best way I know of to get explosive gains quickly while still having defined risk.

"The #1 way to grow a small account with defined risk."

Plain text here...

It's amazing how quickly you can grow a small account using this system and once people see how it works they think, "Oh man, this is crazy, why wouldn't everyone trade like this?"

In fact, I got this message recently from Carla B, who gave me an update after just one week of trading this system She said:

"Dave since Monday, when I put on the first trade, I'm up over \$4,800 in my account. And in my kid's account who have small accounts who can't day trade, they're all up \$1,300."

\$6,100 in profit in just one week? How does that happen?

Zoom in on the highlighted text.

"Risk A Little To Make A Lot"

- Goal is to consistently make 75-150% or more
- Be in the trade for just two to three days (4 tops)
- Have very strict risk control mechanisms in place

Bottom line: make explosive gains, quickly without taking stupid risks

It happens by being able to consistently make 75-150% or more on your trades in just 2 to 3 days... and do it with very strict risk control in place. In other words, you need to be able to get big explosive gains, in a short period of time, without taking stupid risks. You need to figure out how to "risk a little to make a lot."

Options Income Multiplier Trades (OIM)

- Winning trades typically generate \$500-\$700 profit per trade.
- They cost about \$300-\$350 to place trade on average.
- Usually in the trade for 2-3 days (4 days max).

And that's exactly what I'll show you how to do today. I'll explain how it's not only possible, but how we regularly place a certain type of trade, known as an Options Income Multiplier Trades or OIM for short, that costs us about 300 to \$350 but then generates \$600 to \$700 in profit.

OIM Trade on SPX - 187% Gain in 3 Days

Captions...

Like this OIM trade we made on SPX: It only cost us \$350 to place this trade and 3 days later we sold it for \$1,000, giving us a \$650 profit, which is nice. But what's really important is that the most we could have lost was only \$350. And we usually don't even lose that much on the losing trades because we try to place our stop-loss so that we only lose 33 to 50% of our investment.

Plain text here...

Let me show you a few more quick examples of actual OIM trades we've taken and then I'll explain how we're able to do this.

OIM Trade on TSLA - \$650-700 Profit

Captions...

OK so this one is Tesla. Again, the trade cost us between \$300 to \$350 a piece and we sold them for \$1,000 two and a half days later for a net profit of \$650 to \$700 a piece. We actually had 5 of these trades on that day so we netted over \$3,000 of profit on just that one day.

OIM Trade on NFLX - \$600 Profit (150%)

Captions...

Here's an OIM trade we did on Netflix. It cost us \$400 to enter the trade and we sold it for \$1,000 2 days later for a net profit of \$600, which is a 150% gain for just two days of trading.

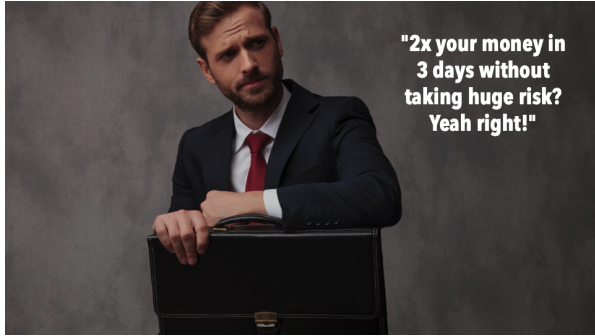

OIM Trade on NFLX - \$450-550/Contract

Captions...

And here's another one we did on Netflix. This cost about \$250 to enter and we made \$550 per contract on the first one and \$450 on the 2nd one! I've got so many of these I could show you because the thing is these setups appear almost daily, which is what I love about this strategy because it gives you ongoing, consistent opportunities to trade this.

<p>Plain text here...</p>	<p>Alright, so taking a step back here, let's recap what we're trying to accomplish with this type of trading strategy....</p>
<div data-bbox="110 453 701 548"><p>3 Main Goals with this Strategy</p></div> <div data-bbox="235 575 589 619"><p>1 Make 75-150% in 2-3 days</p></div> <div data-bbox="235 642 589 686"><p>2 Limit our risk</p></div> <div data-bbox="235 709 589 753"><p>3 Do it consistently</p></div>	<p>#1 - We're placing trades that allow us to double our money in two to three days and #2 without taking a huge risk... again we're risking a little to make a lot. And finally, #3 - we want to do this consistently.</p>
<p>Plain text here...</p>	<p>And that's what trading should be about. It's about multiplying your money quickly, without risking losing all your money. And after all these years in the market, this was the single most important thing I could show my daughter how to do. It's also what I'm going to show you how to do today. Now when most people see these types of results I just showed you they wonder how we're able to pull this off -- and do it so consistently.</p>
<div data-bbox="215 1312 596 1341"><p>Goal: Turn \$300 into \$1,000 in 3 days.</p></div> <div data-bbox="160 1398 639 1587"></div> <div data-bbox="107 1593 696 1669"><p>Captions...</p></div>	<p>I mean turning \$300 into \$1,000 in 3 days -- and doing it in a way where your risk is limited -- is music to the ears of any serious trader. However, for most people this is far from their own reality with trading.</p>

And I understand, if I were to rewind the clock 20+ years to when I was just a young 23-year-old stockbroker at Merrill Lynch I would have smiled and thought to myself, *Yeah right, this guy is full of it. There's no way you can double your money in 2 to 3 days without taking on a huge amount of risk.*

So I get it...

Plain text here...

But do yourself a favor and listen to what I'm going to tell you with an open mind. You can always form your opinion after you hear me out and maybe you will still think I'm full of it... or... you might discover something that could literally change your whole approach to trading and making money.

Captions...

For me and hundreds of other traders this has changed not just how we trade but our whole relationship with money.

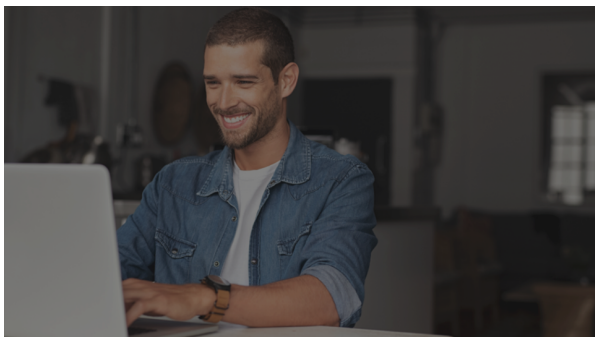

Captions...

When you start to think in terms of multiplication and not just addition you'll never view money the same way again. You'll always want to know how to turn \$2,000 into \$4,000 or \$5,000 into \$10,000. Once it clicks, trading becomes addicting.

Captions...

While everyone else is out there slaving away at their 9 to 5 and trading their precious time for money...

Captions...

you'll be playing a completely different game. A game where your #1 job is multiplying the money that's under your control. And the better you get at this, the more you'll make.

Captions...

So many people want to talk you out of this. They'll want to scare you away by telling you that trading is risky and that you should just continue at your job.

	<p>But the truth is that trading your time for money, aka a job, is one of the worst trades you can make because you can never get your time back.</p>
<p>Plain text here...</p>	<p>And here's the deal, they're all critics until they see the results. Then suddenly they're fans and believers. And they'll start asking <i>you</i> for advice. Ah, it's funny but it's just how it goes.</p>
	<p>So if you can push through the tough part of those first few years of figuring all this out, the reward on the other side is 100% worth it. Personally, I wouldn't trade it for anything else.</p>
<div data-bbox="110 1201 699 1312">Options Income Multiplier Trades</div> <p>Plain text here...</p>	<p>Alright, with that said let's talk about how these Options Income Multiplier Trades work because it's highly unlikely you're trading like this right now or have heard of anyone using this unique methodology.</p>

<p>The 3 Secrets of Consistently Profitable Trading...</p> <p>Secret #1 How To Only Make Limited-Risk Trades Using a Sneaky Hedge Fund Technique.</p>	<p>I'm going to walk you through the 3 secrets of this powerful trading system starting with:</p>

<p>The 3 Secrets of Consistently Profitable Trading...</p> <p>Secret #1 How To Only Make Limited-Risk Trades Using a Sneaky Hedge Fund Technique.</p> <p>Secret #2 How To Profit Like A Million-Dollar Trader Even If You Only Have A \$5,000 Account.</p> <p>Secret #3 How To Capture Big Profit Surges with Debit Spread Profit Ladders.</p>	<p>And then #3 is all about how to capture big profit surges by building debit spread profit ladders. I'll show you how we maximize our profit when we see the price really start to run.</p>
<p>Secret #1</p> <p>How To Only Make Limited-Risk Trades Using a Sneaky Hedge Fund Technique.</p>	<p>So without further ado let's dive in to Secret #1...How To Only Make Limited-Risk Trades Using a Sneaky Hedge Fund Technique.</p>

<p>Plain text here...</p>	<p>When it comes to trading, investing or anything to do with money it's important to take inventory of your beliefs about what's possible and what you think is "normal."</p>
<div data-bbox="110 453 386 783"> <p>"Normal must be resisted if you are ever going to live your life, as who you are, fully, in all your complexity."</p> <p>- Jonathan Mooney</p> </div> 	<p>Jonathan Mooney, author of the book <i>Normal Sucks</i> put it this way:</p> <p>"Normal must be resisted if you are ever going to live your life, as who you are, fully, in all your complexity."</p>
<p>Plain text here...</p>	<p>So who cares what "normal" since normal is not your goal. Because guess what?</p>
<p>Here's What Normal Traders Experience...</p>  <p><i>Play & record the animation from the slide</i></p>	<p>Here's what a "normal" equity curve looks like for most traders. It's a series of small wins followed by big losses.</p>
<p>What "Normal" Traders Experience...</p> <div data-bbox="110 1619 703 1864"> <ul style="list-style-type: none"> • Trying to focus on too many setups instead of mastering one or two. </div>	<p>Normal is trying to focus on too many setups instead of mastering one or two.</p>

<p>What "Normal" Traders Experience...</p> <ul style="list-style-type: none"> • Trying to focus on too many setups instead of mastering one or two. • Being afraid to pull the trigger / constantly doubting yourself. 	<p>Normal is being afraid to pull the trigger because you're constantly doubting yourself.</p>
<p>What "Normal" Traders Experience...</p> <ul style="list-style-type: none"> • Trying to focus on too many setups instead of mastering one or two. • Being afraid to pull the trigger / constantly doubting yourself. • Failing to hit your profit targets most of the time. 	<p>Normal is failing to hit your profit targets most of the time.</p>
<p>What "Normal" Traders Experience...</p> <ul style="list-style-type: none"> • Trying to focus on too many setups instead of mastering one or two. • Being afraid to pull the trigger / constantly doubting yourself. • Failing to hit your profit targets most of the time. • Symmetrical Risk: Thinking risk and reward payoff are equal. 	<p>But the worst thing that has become normalized for traders is this idea of symmetrical risk...</p>
<div data-bbox="134 1381 376 1554" data-label="Image"> </div> <p>Symmetrical risk</p> <div data-bbox="406 1333 703 1665" data-label="Image"> </div>	<p>Which is just a fancy term for saying that the risk and reward payoff are equal. You risk a dollar to make a dollar.</p>

Symmetrical risk

Asymmetrical risk

But what you really want is asymmetrical risk.

Asymmetrical risk is like using a lever and prop to move a large boulder. It's about risking a little to make a lot.

Plain text here...

Once you believe that asymmetrical risk is normal, you'll start to see the markets totally differently. You'll start to think and operate by a different set of rules. But you first need to understand what you're dealing with.

"At first it seemed to me that I faced an all-or-nothing choice: I could either take on a lot of risk in pursuit of high-returns (and occasionally find myself ruined) or I could lower my risk and settle for lower returns. But I needed to have both low risk and high returns..."

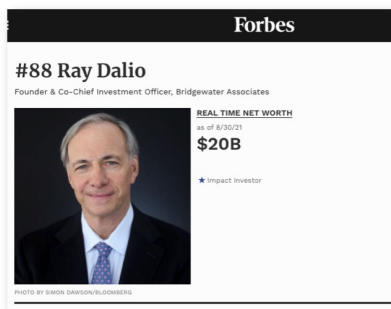

Ray Dalio, the CEO of Bridgewater Associates describes his own experience with this. He says:

"At first it seemed to me that I faced an all-or-nothing choice: I could either take on a lot of risk in pursuit of high-returns (and occasionally find myself ruined) or I could lower my risk and settle for lower returns. But I needed to have both low risk and high returns,

"...and by setting out on a mission to discover how I could, I learned to go slowly when faced with the choice between two things that you need that are seemingly at odds... As difficult as this was, I eventually found a way to have my cake and eat it too."

and by setting out on a mission to discover how I could, I learned to go slowly when faced with the choice between two things that are seemingly at odds... As difficult as this was, I eventually found a way to have my cake and eat it too."

And with a net worth of \$20 billion, I'd say his "low risk, high return" strategy has worked out well for him.

Goal: Low Risk, High Return Trades

And by watching this today, I assume you're on a similar mission. You're looking for a way to trade that gives you low risk and high returns too. And that's what I want to share with you.

Goal: Low Risk, High Return Trades

Low Risk: 3:1 Reward Risk Ratio

High Returns: 75-150% in 2-3 days

Because Secret #1 of the Options Income Multiplier Strategy is all about going after explosive profit surges that happen on a weekly basis where you can potentially make 75 to 150% gains (so high returns) but where you also have a strong 3:1 reward-risk ratio (so low risk).

Goal: Turn \$300 into \$1,000 in 3 days.

So practically speaking, what does that look like? At its most basic level it looks like this. It's pulling out 3 hundred dollar bills and saying,

<p>Plain text here...</p>	<p>And yes, I realize I need to risk something to do this. But I don't want to do what most traders do and risk too much. Instead I want to make sure the MOST I could lose would be those 3 hundred dollar bills I started with. And I want to make sure I win this trade more than half the time. If you do this, you will be profitable. It's simple math and I'll prove it to you.</p>																						
<p>Let's Do the Math: 50% Win-Rate...</p>  <table><tr><td></td><td>\$650.00</td></tr><tr><td></td><td>-\$350.00</td></tr><tr><td></td><td>\$650.00</td></tr><tr><td></td><td>\$650.00</td></tr><tr><td></td><td>-\$350.00</td></tr><tr><td></td><td>\$650.00</td></tr><tr><td></td><td>-\$350.00</td></tr><tr><td></td><td>\$650.00</td></tr><tr><td></td><td>-\$350.00</td></tr><tr><td></td><td>\$650.00</td></tr><tr><td>Total:</td><td>\$1,500.00</td></tr></table>		\$650.00		-\$350.00		\$650.00		\$650.00		-\$350.00		\$650.00		-\$350.00		\$650.00		-\$350.00		\$650.00	Total:	\$1,500.00	<p>Let's say you make 10 trades. Each trade cost you \$350 to make. And each winning trade you average \$650 in profit. While each losing trade is \$350.</p> <p>And let's say you only win 50% of the time.</p> <p>Even if you lose 5 trades but win the other 5 you still come out ahead \$1500:</p>
	\$650.00																						
	-\$350.00																						
	\$650.00																						
	\$650.00																						
	-\$350.00																						
	\$650.00																						
	-\$350.00																						
	\$650.00																						
	-\$350.00																						
	\$650.00																						
Total:	\$1,500.00																						
<p>Plain text here...</p>	<p>I know this may sound very simple. But you don't need to make trading more complicated than this basic formula. Because the more complicated you make it, the more likely your plan will fall apart. So, how do we turn \$300 into \$1,000 in 3 days?</p>																						
<p>Options Spread: How They Work</p> 	<p>We use something called an options spread. So what's a spread?</p>																						

<div>Options Spread: How They Work</div> <div>What: buying and selling the same type of option -- either a call or put -- at the same time.</div>	It's nothing more than buying and selling the same type of option -- either a call or put -- at the same time.
<div>Options Spread: How They Work</div> <div>What: buying and selling the same type of option -- either a call or put -- at the same time. Why: Because you hedge your position when you buy a spread.</div>	The reason you do this is because you hedge your position when you buy a spread.
<div>Options Spread: How They Work</div> <div>What: buying and selling the same type of option -- either a call or put -- at the same time. Why: Because you hedge your position when you buy a spread. Who: Professional money managers, hedge funds, savvy traders use spreads.</div>	So who uses this strategy? Professional money managers, hedge funds and savvy traders use spreads to control their risk all the time.
<div>Wait. Aren't options riskier than stocks?</div>	Now a lot of newer traders I talk to assume that trading options is riskier than trading stocks. And I understand. I used to think options were super risky too.

About me... Dave Aquino

- Helped manage \$650 million AUM for Vanguard.
- Specialized in options income strategies.
- Spent 12+ years working in the ULTRA Client Group.
- Series 7 Broker with Merrill Lynch.

But then I got a job at Vanguard where I helped manage \$650 million in assets and specialized in options income strategies. I also spent several years working for Merrill Lynch as a general securities broker.

Plain text here...

At these firms I saw firsthand how professional money managers use options as a tool to make consistent gains.

"Think Vanguard and Merrill Lynch, might know how to generate consistent income?"

Think about it... do you think companies like Vanguard, might know a thing or two about how to generate consistent income?

Plain text here...

After spending over 25 years in the financial markets I learned that success in trading is not about luck, it's about learning how to play the game so you consistently have an edge that results in you being profitable over the long haul.

Now I've been coaching and mentoring traders for the last 8 years here at Base Camp Trading.

"I don't like options."

"Why?"

"Because I've heard they're too risky."

"That's not true. And I'll show you why."

And when a new trader comes to me and says, "Uh Dave, no I don't like options because they're too risky." I explain to them that the opposite is actually true. Because if you know how to do it right, it's actually *less* risky than stocks. Because they give you more freedom on how to structure your positions.

Options Income Multiplier (OIM) Trades: Real Life Examples

Let me show you some real life examples so you can see how this works. I think it'll make a lot more sense.

OIM Trade: NFLX

Captions...

So this is Netflix on the daily chart. I've been trading Netflix for 6+ years, so I have a pretty good feel for how it moves. And in this scenario I saw it pull back right here and then I got a bullish signal on a proprietary indicator we use here at Base Camp.

So basically I got a tap on the shoulder telling me, "Netflix is about to experience a huge Profit Surge," which is basically when the stock lunges forward quickly...

So my indicator tells me a Profit Surge is about to take place as soon as we break the 317 level.

So I set up an OIM spread to capture the gains from this profit surge. I'll buy a 320/330 call debit spread, which costs me around \$350.

It's like I'm casting a net around these prices.

	<p>It doesn't have to hit a specific price for this trade to be profitable. It's not like I'm saying: "Well if it hits \$327 exactly then I'll make money."</p> <p>Nope. I'm casting this \$10-wide spread and as long as price ends up in this general vicinity or higher, I'll be profitable.</p> <p>In this case the price went way above \$330 so after we completed the trade just 3 days later, our net value was \$1,000. It cost us \$350 so we had a net profit of \$650. That's a 185% return in 3 days.</p>
<p>Goal: Turn \$300 into \$1,000 in 3 days.</p> 	<p>So what did we do essentially?</p> <p>We turned those three hundred dollar bills, plus an extra \$50 bill... Into \$1,000 in 3 days.</p>
<p>Plain text here...</p>	<p>OK, but that's not even the best part. Some of you more experienced traders watching are asking a good question... "Yeah Dave, that's all fine and dandy when you win... but what if you would have lost?"</p> <p>Great question. And that's a question you should ALWAYS be asked before every trade . Because every savvy trader first asks: "What's the downside? How much could I lose?" They do this before they consider the upside.</p> <p>In this particular case, the maximum we could've lost was \$350. But we normally set our stop loss anywhere from 30 to 50% to do it the smart way. But the most, if something went completely wrong, the most we could've lost was \$350.</p>

Big Win - SPX Momentum Breakout

Captions...

So let's take a look at another example: Here's one of the main types of OIM trades we take on a regular basis, it's called a Momentum Breakout Trade.

Now I'm showing you these on an hourly chart, but usually we use and look for these opportunities on a daily chart. But just so you can actually see how we utilize them on debit spreads, I'm going to show it to you on this lower time frame chart.

So in this trade we see price pull back and then an acceleration. We actually have a cross right in this area, but what's more important about this momentum breakout trade, when we look at it on a daily chart, is that we are breaking the previous daily high... that pivot point is at 3,294.

When we get that breakout, we'll go ahead and set up our Options Income Multiplier Trade. We only do this on the break of that pivot high. This is because we want to evaluate our highest consistently performing swing trades.

These are the OIM trades we take 80% of the time. So, we'll go ahead and establish the call debit spread. In this case, a \$10 wide spread. We purchase it anywhere from \$300 to \$350. That's normally what a spread like this costs.

And then if price continues to move through the spread, we will allow it to go to maximum profit, which is at the end of expiration. This is how we generate that \$1,000 of value.

Plain text here...

So those are just a few real life examples of Secret #1 at work on How To Only Make Limited-Risk Trades Using this technique.

Secret #2

How To Profit Like A Million-Dollar Trader Even If You Only Have A \$5,000 Account.

So let's move on to Secret #2...

All right, so moving on to secret number two, "How To Profit Like A Million-Dollar Trader Even If You Only Have A \$5,000 Account."

What I want to talk about now is an idea that many traders believe that keeps them poor and from making big gains...

I don't know how many new traders I've talked to who say things like this:

What If You Don't Have a Big Account?

"But my account is pretty small."

"I don't know if I have enough capital to do this."

"Don't you need a lot of money to trade options?"

"Well Dave, after seeing this I think I could place these trades, but my biggest problem is my account is pretty small. So I don't have enough capital to do this yet. Especially if you're talking about options. I mean don't you need a lot of money to trade those?"

I Used To Think You Needed A Ton of Money To Trade Options...

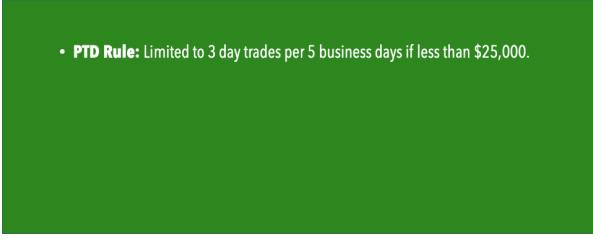

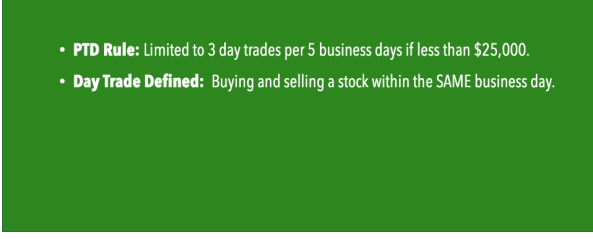

And here's the deal...

I understand. I used to think you had to have a ton of money to trade options.

When I worked for Vanguard, who now has over \$7 trillion of assets under management, we traded multi-million-dollar accounts. And that was "normal" for me. So if someone told me back then that they were going to trade a \$3,000 or \$5,000 account I probably would have not taken them very seriously.

Because I believed it took a lot of money to succeed with trading, especially with options.

 <p>The Advantages of Trading a Small Account</p>	<p>But as I began trading my own money I realized that starting with a small account actually has many advantages over larger ones. And I want to explain what those are. But first let me address a common question about this, which is:</p>
<p>What about the Pattern Day Trader Rule?</p> 	<p>“What about the Pattern Day Trader Rule?”</p>
<p>What about the Pattern Day Trader Rule?</p>  <ul style="list-style-type: none"> • PTD Rule: Limited to 3 day trades per 5 business days if less than \$25,000. 	<p>Ok, so the Pattern Day Trader Rule states that if you have an account with less than \$25,000 then you are only allowed to make three day trades per five business days.</p>
<p>What about the Pattern Day Trader Rule?</p>  <ul style="list-style-type: none"> • PTD Rule: Limited to 3 day trades per 5 business days if less than \$25,000. • Day Trade Defined: Buying and selling a stock within the SAME business day. 	<p>But here’s the workaround...</p> <p>This rule specifically defines a day trade as buying and selling a stock within the SAME business day. This is of course known as day trading or intraday trading.</p>

<p>What about the Pattern Day Trader Rule?</p> <ul style="list-style-type: none"> • PTD Rule: Limited to 3 day trades per 5 business days if less than \$25,000. • Day Trade Defined: Buying and selling a stock within the SAME business day. • Solution: Swing Trading (where you're in the trade for over 24 hours). <p>Swing Trading is NOT subject to the PTD Rule.</p>	<p>However, that's only ONE way to trade. There's also something called swing trading. And that's what we're doing here. Swing trading is when you are in the trade for more than one day. It could take 2 or 3 days or 2 or 3 weeks.</p> <p>And the beauty of this is it's not subject to the Pattern Day Trading Rule. And the strategy I'm showing you today is a swing trading one. That means you're not in danger of violating this rule, which is another reason why this is so effective for smaller accounts.</p>
<p>Plain text here...</p>	<p>A lot of people think that it's only day traders who can generate the massive returns on their trades. But the truth is it's also possible for swing traders to double their money on their trades in just a couple days.</p>
<p>Key Takeaways:</p> <ol style="list-style-type: none"> 1 You don't have to be in and out same day to make big gains. 2 You can still make big gains by swing trading. 3 Swing trading allows you to bypass the PTD Rule. 	<p>The point is you don't have to be in and out the same day to walk away with big winners. You can slow it down and still make big gains but just spread it out over a couple days.</p> <p>Plus, if you trade like this then there's no limit to how many trades you can place each week. So think of this as a legal loophole that allows you to be 100% compliant with the government but still gives you freedom to make as much profit as you want. Make sense?</p> <p>OK let's move on.</p>

<div>Secret #2</div> <div>How To Profit Like A Million-Dollar Trader Even If You Only Have A \$5,000 Account.</div>	Now let's talk about how you can Profit Like A Million-Dollar Trader Even If You Only Have A \$5,000 Account.
<div>Remember...</div> <ul style="list-style-type: none">You don't need a big account to generate big gains.	Because contrary to popular belief, you don't need a million dollars to generate big, consistent gains when you trade.
<div>Remember...</div> <ul style="list-style-type: none">You don't need a big account to generate big gains.You can start with just \$5,000.	You can start right now with just \$5,000 or less and
<div>Remember...</div> <ul style="list-style-type: none">You don't need a big account to generate big gains.You can start with just \$5,000.You can still make potential gains of 75-150% in 2-3 days.	still walk away with potential gains of 75 to 150% or more.

<div data-bbox="110 231 332 294">Remember...</div> <ul style="list-style-type: none"> • You don't need a big account to generate big gains. • You can start with just \$5,000. • You can still make potential gains of 75-150% in 2-3 days. • Plus, in some ways a smaller account gives you an edge. 	<p>Not only is it possible to profit like bigger traders with a smaller account; in some ways you actually have an edge.</p>
<div data-bbox="110 583 703 667">Small Account Edge #1: Easier to Get Filled</div> <ul style="list-style-type: none"> • Small Positions are EASIER to Get Filled. 	<p>For example, when you have a smaller account your position size is smaller, so it's easier to get filled when it comes time to close out your position and take your profit.</p>
<div data-bbox="110 961 703 1045">Small Account Edge #1: Easier to Get Filled</div> <ul style="list-style-type: none"> • Small Positions are EASIER to Get Filled. • Big Positions are HARDER to Get Filled. 	<p>When you have a bigger position you can have a much harder time getting your entire order filled at a specific price.</p>
<div data-bbox="110 1339 703 1423">Small Account Edge #1: Easier to Get Filled</div> <ul style="list-style-type: none"> • Small Positions are EASIER to Get Filled. • Big Positions are HARDER to Get Filled. • Small Accounts = LESS Slippage. 	<p>For instance, a bigger trader could take out bidders while selling, causing the price to drop. This is called slippage and it's a very real problem when you're trading a lot of money.</p>

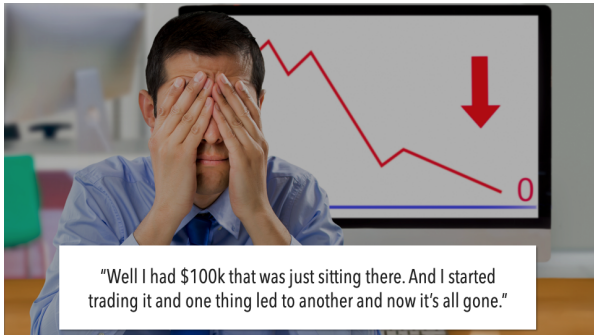

<div data-bbox="110 210 701 289"> Small Account Edge #1: Easier to Get Filled </div> <ul style="list-style-type: none"> • Small Positions are EASIER to Get Filled. • Big Positions are HARDER to Get Filled. • Small Accounts = LESS Slippage. • You Can Get In & Out Quicker (PAID FASTER). 	<p>But when you have a small account position you can typically get in and out at the price you pretty much want without any hassle. This makes it a lot easier to consistently pull money out of the market at the price you want. So that's a distinct advantage for smaller accounts.</p>
<div data-bbox="110 585 701 665"> Small Account Edge #2: Capital Efficiency </div> <ul style="list-style-type: none"> • Having less forces efficiency. 	<p>Another advantage of trading a small account is called Capital Efficiency. When you have less of anything in life it forces you to be more efficient.</p>
<div data-bbox="110 961 701 1041"> Small Account Edge #2: Capital Efficiency </div> <ul style="list-style-type: none"> • Having less forces efficiency. • Parkinson's Law applies to time. 	<p>This is true with time -- think about Parkinson's Law which states that work will expand to fill the time allotted for its completion. You've probably experienced this with a project you've done.</p> <p>Think back to a time when you had to get something done in a short period. How efficient were you?</p> <p>Now think about projects you have -- maybe ones around the house -- that have no urgent deadline. Isn't it interesting how they can just drag on forever?</p>
<div data-bbox="110 1507 701 1587"> Small Account Edge #2: Capital Efficiency </div> <ul style="list-style-type: none"> • Having less forces efficiency. • Parkinson's Law applies to time. • It also applies to money and trading. 	<p>Well, the same is true for money. The more you have the easier it is to become careless with your expenses.</p>

Small Account Edge #2: Capital Efficiency

- Having less forces efficiency.
- Parkinson's Law applies to time.
- It also applies to money and trading.
- More \$\$\$ = Less Careful.

But if you decide to limit your spending to a certain amount each month you'll immediately become more efficient with your money. And trading is no different.

I've worked with many traders who have come to me for help after blowing up their account. The worst stories always begin with...

"Well I had \$100k that was just sitting there. And I started trading it and one thing led to another and now it's all gone."

"Well I had a hundred grand that was just sitting there and I started trading it and then one thing led to another... and now it's all gone."

When people lose A LOT of MONEY trading...

Guess what the common denominator is?

You wouldn't believe some of the horror stories I've heard.

And guess what the common denominator is...

When people lose A LOT of MONEY trading...

Guess what the common denominator is?

Answer: A LOT of MONEY

A new trader with a big account.

Why?

<p>When people lose A LOT of MONEY trading...</p> <p>Guess what the common denominator is?</p> <p>Answer: A LOT of MONEY</p> <div> <p>When you have \$200,000 and you lose \$3,000 it's not a big deal... ...when you only have \$5,000 it's unacceptable to lose \$3,000.</p> </div>	<p>Because it's easy to be careless when you have a couple hundred thousand dollars in cash. You lose \$3,000 and you think, "Oh man, that was a bad trade. But that's nothing. I still have a lot more and I'll get it back."</p> <p>But when you <i>only</i> have \$5,000 it becomes unacceptable to lose \$3,000 -- so you don't even put yourself in that position.</p>
<p>Options Income Multiplier Trades</p> <div> <ul style="list-style-type: none"> • Risk a little to make a lot (only risk the cost of the trade). </div>	<p>Which is why I love the Option Income Multiplier Trades. Because they allow you to risk a little to make a lot.</p>
<p>Options Income Multiplier Trades</p> <div> <ul style="list-style-type: none"> • Risk a little to make a lot (only risk the cost of the trade). • Risking \$300 to 350 in order to make... </div>	<p>Remember, you're only risking the cost of the trade, which many times is only around \$300 to \$350.</p>
<p>Options Income Multiplier Trades</p> <div> <ul style="list-style-type: none"> • Risk a little to make a lot (only risk the cost of the trade). • Risking \$300 to 350 in order to make... • ...\$600 to \$700 in just 2 to 3 days. </div>	<p>But you're aiming to make \$600 to \$700. And even when you don't, you're only out a <i>few hundred</i> dollars not a <i>few thousand</i> dollars. Big difference.</p>

NFLX OIM Trade: \$600 Profit (150% Gain)

Captions...

OK so here's another Netflix trade on the daily chart. Have you ever noticed when the markets are moving higher, it'll put in a top and then it'll come back in and then it'll reverse off that top?

We play these pullbacks. And we have a specific OIM trade called a Box Reversal for these situations.

And what we normally aim for is a 50% retracement. So when we get that double top, we'll look for a pullback, from the pivot low to the pivot high and get a measurement on that 50% retracement. We are comparing the low to high and looking for that 50% pullback.

In this particular case, that pullback results in our ability to place a 430 by 440 put debit spread. Now this put costs us about \$400, because with the puts they're much closer, so they're a little more expensive. But at expiration we're able to sell it for \$1,000. So this is a \$600 profit or a 150% gain.

Now imagine here if you weren't using the leverage of options. In order to get in this type of trade -- and make that kind of gain that quickly using stocks -- you would have to buy 100 shares at a price of \$440 per share, that comes out to \$44,000. But we were able to control those shares with a one contract spread for \$400. That's the power of leverage.

Secret #3

How To Capture Big Profit Surges with Debit Spread Profit Ladders.

Alright, let's move on to secret number three. Because I want to show you how to capture really big profit surges using something called a Debit Spread Profit Ladder.

I'll show you some real life examples of these,

Multiplying a \$650 Profit into \$3,000

including ones like these: Where we turned a \$650 profit into \$3,000 profit, using this profit ladder technique. And this is where it gets really exciting. And this will be new information for a lot of traders who aren't used to doing debit spreads.

Argument Against Trading Spreads...

Because one of the main arguments against debit spreads is that your profit potential is limited.

People will say:

Argument Against Trading Spreads...

"I like the limited risk part...but I don't like having my upside capped."

"Well, yeah I like the fact that your risk is limited, but I don't like the idea of having my upside capped."

Which is a fair argument because your upside is limited, per spread...

Argument Against Trading Spreads...

"I like the limited risk part...but I don't like having my upside capped."

This is true...unless you know how to do **Profit Ladders**.

Unless you know how to construct these Debit Spread Profit Ladders. So pay attention to this.

The easiest way to explain this is to just show you how it works.

OIM Trade on SPX - 187% Gain in 3 Days

Captions...

OK, so remember the example I showed you earlier on SPX? Where we made \$650 on the \$10-wide spread? This one right here?

So even if you didn't know how to do a debit spread profit ladder you still could have walked away with a \$650 profit on this OIM trade.

But sometimes, like in this situation, price keeps moving up. And if you only did one then you would miss out on the rest of the move.

And this is a common criticism people have against spreads...

They'll say, "See, if you would have bought a call then you would have made a lot more."

But what they don't tell you is that if you were wrong you could have lost a lot more too because those calls are way more expensive.

However, there is a way to limit your downside while still capturing the big runners using these profit ladders.

And this is how it works. So on this trade with SPX we saw price continue to move the next day.

We already hit our profit target of \$650 with this first OIM trade here... But once we realized we were in the midst of a *huge* profit surge, which means the price is lunging forward quickly, then we know to construct our profit ladder.

Basically what we're doing is putting on two more debit spreads, consecutively, day after day as opportunity presents.

Profit Ladder = \$3,000 Profit

Captions...

And in this situation the price continued to run higher the next day, so what did we do? We stack two more spreads even higher to capture more of the move.

You can think of these like rungs in a ladder, hence the name. So as price breaks the next high of the debit spread, we put another rung of the ladder. We continue to build the ladder and we continue to collect more money as price climbs up our profit ladder.

And by the way, these are weekly options. So we actually hold these all the way through to expiration, which is the end of the week. As long as we continue to move higher on the daily chart we continue to build the ladder. In this particular example, SPX continues to move higher and all these debit spreads expire in the money... which means each rung is worth \$1,000.

Remember, it costs us between \$300 to \$350 to enter each one. So our net profit is roughly \$600... uh, 600 to \$700 profit for each one conservatively. So we have five of them with this trade. So we make at least \$3,000. Not bad at all for this kind of surge move.

Plain text here...

Again, that is the process. And honestly profits are nice, but the fact we can implement the trade setups this way is what can lead us to big, consistent wins, which is the key to making consistent income as a trader.

Now, do you see why I'm such a big fan of this strategy? And why I decided to teach my daughter this way of trading above every other way out there?

I'm telling you, once you know how to do this you can write your own ticket as a trader.

Profit Ladder on NFLX = \$450-\$550/Contract

Captions...

OK, let me show you another example...So I just showed you how to do a Debit Spread Profit Ladder on SPX.

Now let me show you another trade we did on Netflix. Now this one is a little bit different. This is where the Profit Surge started. You can see how we are in this sideways pattern. So we're looking for a Profit Surge and Netflix had a tremendous day. Now these are more profitable because these are \$10 wide spreads -- normally we do \$5 wide ones. The profit per contract, or per step of the ladder, is \$550 a contract. And in the second one it's \$450 per contract.

These OIM trades cost \$200 to \$250 each. Sometimes they can be up to \$300. What drives it? It depends on the strength of the upside move. Options get a little expensive when they're moving fast. But if you're getting in at a conservative entry like I'm telling you, then you can get in right at the beginning. It's a little bit cheaper.

So you can make, say \$550 per contract. The second rung on this profit ladder is only \$450 because it's already moving.

You might ask, "How come you just did two this time?" Technically you could do as many as price allows you to.

But sometimes I like to be a little more conservative and not overplay my hand with these. Because again, you're not expecting Netflix to move to the moon, right? So I'm just telling you what I did. And yes, you can choose to be more aggressive and continue to build on a move -- but usually if I take one, two, three trades I can walk away with some pretty comfortable profits -- in this case \$1,000 in profit.

Profit Ladder on TSLA - \$3,000 Profit

Captions...

Let's look at one last example of how these profit ladders work on these OIM trades, because I want to also show you how you can get started taking these trades yourself as early as next week. Alright so this is an OIM trade we did on Tesla.

Now, in Tesla before the split we did these trades as a \$20-wide debit spread... Most of the examples I showed you today were \$10-wide or \$5-wide. So the profit on these are anywhere from \$650 to \$700 a contract.

Tesla options are expensive. So we wanted to capture as much of the move as we could but then take profits at a relatively quick pace.

So we see: one, two, three, four, five rungs on this profit ladder. \$650 to \$700 profit per contract, that's 3,200 to \$3500 of profit, in one day. Tesla made a lot of traders rich.

The 3 Secrets of Consistently Profitable Trading...

Alright, so do you have a better idea of how this works? Just to recap... we talked about three core parts of this Options Income Multiplier Strategy.

The 3 Secrets of Consistently Profitable Trading...

Secret #1

How To Only Make Limited-Risk Trades Using a Sneaky Hedge Fund Technique.

Part one was all about how to make limited risk trades using the power of spreads, which is a proven way to hedge your positions that most of the top hedge funds and big banks use when they trade. This protects your downside.

<p>The 3 Secrets of Consistently Profitable Trading...</p> <p>Secret #1 How To Only Make Limited-Risk Trades Using a Sneaky Hedge Fund Technique.</p> <p>Secret #2 How To Profit Like A Million-Dollar Trader Even If You Only Have A \$5,000 Account.</p>	<p>Then we talked about part 2 which was how to profit like a million dollar trader, even if you have a small account. So I showed you not only how this can work for small accounts, but also some ways it can give you an edge, like getting in and out of positions easier, something that's harder to do when you have a big position.</p>
<p>The 3 Secrets of Consistently Profitable Trading...</p> <p>Secret #1 How To Only Make Limited-Risk Trades Using a Sneaky Hedge Fund Technique.</p> <p>Secret #2 How To Profit Like A Million-Dollar Trader Even If You Only Have A \$5,000 Account.</p> <p>Secret #3 How To Capture Big Profit Surges with Debit Spread Profit Ladders.</p>	<p>And then we just talked about how to capture big profit surges by building debit spread profit ladders -- which allows you to maximize your profit when you see price <i>really</i> start to run.</p>
<p>Plain text here...</p>	<p>Now let me ask you a question... Are you excited about what we just covered?</p> <p>Are you thinking, "This sounds interesting but the whole idea of spreads is still a little intimidating. Not sure I could do this on my own."</p> <p>So, what if I did this for you?</p>
<p>What if I "stood over your shoulder" and showed you?</p> 	<p>What if I could stand over your shoulder and show you</p>

<div>What if I "stood over your shoulder" and showed you?</div> <div><div>➡ Which trades to place</div></div>	exactly which trades to place,
<div>What if I "stood over your shoulder" and showed you?</div> <div><div>➡ Which trades to place</div><div>➡ When to enter</div></div>	when to enter the trade,
<div>What if I "stood over your shoulder" and showed you?</div> <div><div>➡ Which trades to place</div><div>➡ When to enter</div><div>➡ When to exit the trade</div></div>	when to exit the trade,
<div>What if I "stood over your shoulder" and showed you?</div> <div><div>➡ Which trades to place</div><div>➡ When to enter</div><div>➡ When to exit the trade</div><div>➡ When to take your profit</div></div>	when to take your profits,

<div>What if I “stood over your shoulder” and showed you?</div> <div><div><div>➔ Which trades to place</div><div>➔ When to enter</div><div>➔ When to exit the trade</div><div>➔ When to take your profit</div><div>➔ How to structure Profit Ladders</div></div><div></div></div>	<p>and exactly how to structure those Profit Ladders just like I showed you...</p> <p>And imagine if I did that for you a couple times each week?</p>
<div>OIM Trade on NFLX Setting Up</div> <div><div></div><div><ul style="list-style-type: none">• OIM Trade Setup Approaching</div></div>	<p>I’d say, “Ok here’s a high-probability Options Income Multiplier Trade setting up on Netflix.</p>
<div>OIM Trade on NFLX Setting Up</div> <div><div></div><div><ul style="list-style-type: none">• OIM Trade Setup Approaching• Buy: \$10-Wide Spread</div></div>	<p>I want you to buy a \$10-wide debit spread right here.</p>
<div>OIM Trade on NFLX Setting Up</div> <div><div></div><div><ul style="list-style-type: none">• OIM Trade Setup Approaching• Buy: \$10-Wide Spread• Cost: \$300</div></div>	<p>It’ll cost you \$300</p>

<div data-bbox="110 210 701 275">OIM Trade on NFLX Setting Up</div> <div data-bbox="110 296 435 512">A stock chart for Netflix (NFLX) showing price movement. A green horizontal line is drawn at the 48.100 price level, representing the 'Buy' point of the OIM trade setup. The chart also shows other price levels like 5.970, 1.720, 538.137, 0.314, 1.190, 0.332, 0.336, 0.479, and 1.728.</div> <div data-bbox="467 310 669 426"><ul style="list-style-type: none">• OIM Trade Setup Approaching• Buy: \$10-Wide Spread• Cost: \$300• Sell for: \$1,000</div>	<p>but I want you to sell it for \$1,000.</p>

The chart also shows other price levels like 5.970, 1.720, 538.137, 0.314, 1.190, 0.332, 0.336, 0.479, and 1.728.</div> <div data-bbox="467 1054 669 1236"><ul style="list-style-type: none">• OIM Trade Setup Approaching• Buy: \$10-Wide Spread• Cost: \$300• Sell for: \$1,000• Duration: 3 Days• Profit Target: \$700</div>	<p>you close out your trade and walk away \$700 richer. Wouldn't that be nice?</p>
<p>Plain text here...</p>	<p>If this sounds like something you're interested in then can I take just a few minutes to go over a special program I created to help traders implement this strategy?...</p>

Ok, great... so the program is called the Options Income Multiplier Advisory Service or OIM for short.

What You're Gonna Get...

This is a Trade Alert Service where I send you live “done for you trades” every week.

As an OIM member you'll get consistent, high profit trades, several times a week delivered straight to your inbox.

- Detailed Entry Points

You'll receive an email that looks like this that links to a video where I give you the exact details of the trade with detailed entry points

 <ul style="list-style-type: none"> • Detailed Entry Points • Specific Profit Targets 	<p>and specific profit targets. So you'll know exactly how to set up the trade...</p>
 <ul style="list-style-type: none"> • Detailed Entry Points • Specific Profit Targets • How Long To Be in Trade For 	<p>exactly how long to hold it for...</p>
 <ul style="list-style-type: none"> • Detailed Entry Points • Specific Profit Targets • How Long To Be in Trade For • What To Do if Market Pulls Back 	<p>What to do if the market pulls back...</p>
 <ul style="list-style-type: none"> • Detailed Entry Points • Specific Profit Targets • How Long To Be in Trade For • What To Do if Market Pulls Back • When To Exit the Trade 	<p>and when you should exit the trade. You'll have detailed instructions for each trade so you don't have to guess about anything. Ok?</p>

- 2-3 trade alerts a week

So lately we've been trending towards a few trades each week. Sometimes it's a little slower, if the market is quiet, you'll get less. If it's really moving you'll get a lot more.

But typically you'll see at least 2 to 3 alerts a week.

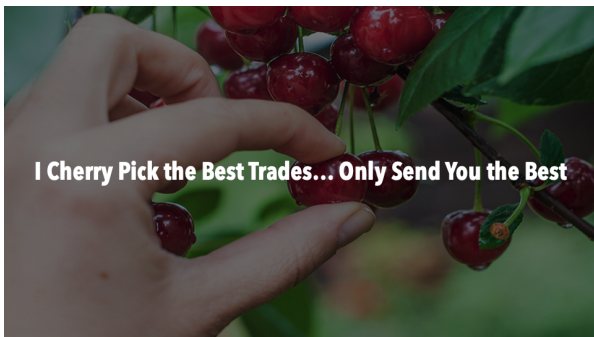

- 2-3 trade alerts a week
- 100+ trades a year

So that's well over 100, "done for you" OIM trades a year.

- 2-3 trade alerts a week
- 100+ trades a year
- Can run all year long

Now, the nice thing about this strategy is that you can run it 52 weeks a year; even in the dead of summer because I always have OIM trades in the hopper ready to go. In fact, there's even some weeks when I even have more trades than I can possibly do anything with.

For example, the other week, we had a day where we had four or five different OIM trade opportunities out there. But I picked the best 2 or 3 opportunities. So if there's a lot of opportunities I'll cherry pick the best ones and send those to you. Because I only want you swinging at the best pitches.

<div>Let Us Do the Heavy Lifting for You...</div> <div></div>	Another benefit of being an OIM Member is you get to plug into a system where all the heavy lifting has already been done for you.
<div>Let Us Do the Heavy Lifting for You...</div> <div><div><div>✓Study Charts for Hours</div></div></div>	So you don't have to spend hours each day, like I do,
<div>Let Us Do the Heavy Lifting for You...</div> <div><div><div>✓Study Charts for Hours ✓Monitor Trading Indicators</div></div></div>	studying charts,
<div>Let Us Do the Heavy Lifting for You...</div> <div><div><div>✓Study Charts for Hours ✓Monitor Trading Indicators ✓Do Technical Analysis</div></div></div>	following indicators,

Let Us Do the Heavy Lifting for You...

- ✓ Study Charts for Hours
- ✓ Monitor Trading Indicators
- ✓ Do Technical Analysis
- ✓ Do Fundamental Analysis

or doing a bunch of fundamental

Let Us Do the Heavy Lifting for You...

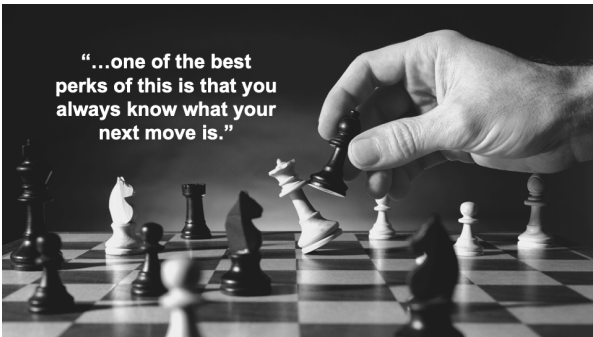

- ✓ Study Charts for Hours
- ✓ Monitor Trading Indicators
- ✓ Do Technical Analysis
- ✓ Do Fundamental Analysis

and technical analysis.

It's like someone I heard say:

"...one of the best
perks of this is that you
always know what your
next move is."

"You know one of the best perks of this is that you always know what your next move is."

And I thought that was a good way to put it... you're never sitting there wondering what to do. Instead, you're focused on placing trades and collecting profit; not wasting hours over-analyzing the markets.

How It Works...

OK, so here's how it works:

<div>How It Works...</div> <div><div>1</div>Enroll Today</div>	Step 1: you enroll today.
<div>How It Works...</div> <div><div>1</div>Enroll Today</div> <div><div>2</div>Get OIM Trade Alerts</div>	Step 2: you start getting the OIM trade alerts...usually after 4pm eastern.
<div>How It Works...</div> <div><div>1</div>Enroll Today</div> <div><div>2</div>Get OIM Trade Alerts</div> <div><div>3</div>Place Your Trade</div>	Step 3: you watch the short 2-minute video and then you'll place your trade before the market opens the next day. It shouldn't take you more than 10 to 12 minutes from the time you watch the video to the time you're done setting up your trade.
<div>Focus On Executing Your Trades</div> <div></div>	So now instead of spending your energy trying to figure out WHAT to trade, you can instead concentrate on setting up the trade exactly how I tell you. Then after you exit you can reflect on it and see how you could improve it.

Plain text here...

Maybe you did it 80% right and got 80% of the profit potential. And next time you want to do it 85 or 90% right. So that becomes what you focus on now.

And because these are the same type of trades you'll be doing week after week you'll have plenty of opportunities to get better at it. It's like practicing your golf swing or opening chess move. You'll repeat it so many times it'll eventually become second nature.

Up \$6,100 after 1 week - Carla B.

Questions				
Show Answered Questions				
X	Question	Asker	Rec'd	Answer
1	Hi Dave,	Carla	11:31 AM	
2	Audio 2222	maria alexander-bridge	11:31 AM	
3	For anyone that is on the fence about buting the course. Since Monday, when I put the first trade in, I am up over \$4800 in my account, and my kids who have small accounts, and can't daytrade are up over \$1300. Well worth the price of admission.0001...0	Carla	11:33 AM	✓ All: You Go Carla!!
4	2	Carla	11:34 AM	✓ Be sure to take some of your profits off. If it really runs you'll still have plient profits to make!
5	0	Carla	11:34 AM	
6	0.....	Carla	11:34 AM	

And remember, Carla who I told you about earlier? Well, these are the same types of trades she was taking that allowed her to make \$4,800 in her first week of following this strategy.

Now I'm not promising you're going to make that. Everyone starts out with a different account size and not everyone follows the instructions I send out perfectly. So there's no promises.

Plain text here...

But imagine if you even made 20% of that in a week? Would an extra \$1,000 a week be nice?

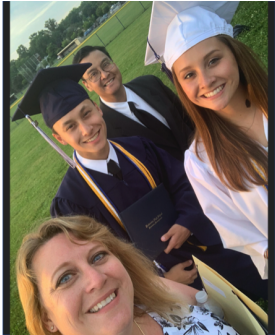

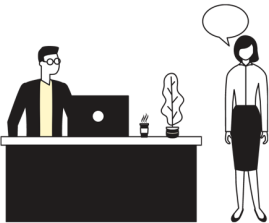

That's not exactly life changing money but for a lot of folks out there an extra \$4,000 a month in income can go a long way, especially these days.

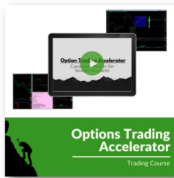

Still on the fence?

Now if you're wondering:

"Well Dave, this sounds good but I'm on the fence about making trades that I don't completely understand."

<p>Plain text here...</p>	<p>I mean I would also like to learn how to trade, not just blindly follow your advice.</p> <p>I completely understand.</p>
	<p>Remember, my daughter London, who I told you about earlier who said,</p>
<p>"Dad, can you teach me how to trade?"</p> 	<p>"Dad, can you show me how to make money trading!"...</p>
	<p>Listen, I love my daughter but I don't just want her copying all my trades.</p>
<p>Plain text here...</p>	<p>I mean sure, she'd make money that way but she wouldn't be learning at a deeper level. So what happens the day I'm no longer around to look over her shoulder and tell her what to do? That's why I also teach her 'how to fish' instead of just giving her a fish. And if you choose to become an OIM Member I'll do the same for you...</p>

<div>2 Parts To This Program:</div>		Which is why there's actually two parts to this service:
<div>2 Parts To This Program:</div>	1. The Trade Alerts	First, there's the trade alerts you'll get each week showing you WHAT to trade...
<div>2 Parts To This Program:</div>	1. The Trade Alerts 2. The Training	...and then there's also a comprehensive library of trainings that will educate you on HOW to trade this.
<div>Options Trading Accelerator Workshop</div> <div></div>		The first training is my popular Options Trading Accelerator Workshop. In this workshop I pull back the curtains and show you how this strategy works.

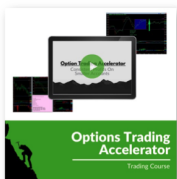

Options Trading Accelerator Workshop

- How to construct OIM trades.

I'll walk you through: how to construct these trades,

Options Trading Accelerator Workshop

- How to construct OIM trades.
- How the Profit Ladders work.

a deep dive on debit spread profit ladder strategy,

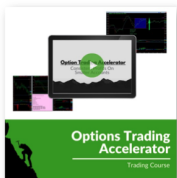

Options Trading Accelerator Workshop

- How to construct OIM trades.
- How the Profit Ladders work.
- How to enter & exit trades to maximize profit.

how to enter and exit trades for maximum profit potential and minimize risk...

Options Trading Accelerator Workshop

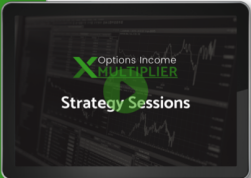

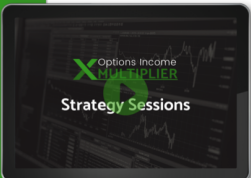

- How to construct OIM trades.
- How the Profit Ladders work.
- How to enter & exit trades to maximize profit.
- All you need to know about OIM trades.

Basically everything you need to know about how the Options Income Multiplier trades you'll be placing, so you'll become an expert at it.

<p>Developed the Workshop which Became Popular...</p> 	<p>The backstory is I developed this workshop first several years ago and it became so popular that the people trading it started to use it and become profitable... so word started to spread about these types of trades. So we eventually created the trade alert service to keep up with the demand from people who wanted to know the exact OIM trades I was taking.</p> <p>So we eventually created the trade alert service to keep up with the demand from people who wanted to know the exact OIM trades I was taking.</p>
 <p>= LEARN</p>  <p>=</p>	<p>So the workshop is where you can actually learn about how these trades work.</p>
 <p>= LEARN</p>  <p>= EARN \$\$\$</p>	<p>And the Options Income Multiplier Advisory Service is where I publish the live trade alerts, with all the step-by-step instructions on how to place the trade.</p> <p>This allows you to “earn while you learn,” which is the best way to learn anything, right?</p>
<p>Plain text here...</p>	<p>OK, so what’s the price for all this?</p>

<div data-bbox="110 216 703 258" data-label="Section-Header"> <p>What You're Gonna Get...</p> </div> <div data-bbox="196 277 228 319" data-label="Image"> </div> <div data-bbox="248 279 680 306" data-label="Text"> <p>- Options Income Multiplier Advisory Service (2 years) Value: \$5,994</p> </div>	<p>Well the retail value for the Options Income Multiplier Advisory Service is \$2,997 a year. And for two years that comes to about six grand.</p>
<div data-bbox="110 585 703 627" data-label="Section-Header"> <p>What You're Gonna Get...</p> </div> <div data-bbox="196 648 228 690" data-label="Image"> </div> <div data-bbox="248 651 680 678" data-label="Text"> <p>- Options Income Multiplier Advisory Service (2 years) Value: \$5,994</p> </div> <div data-bbox="190 701 237 743" data-label="Image"> </div> <div data-bbox="248 703 680 730" data-label="Text"> <p>- Options Trading Accelerator Workshop Value: \$1,497</p> </div>	<p>And the Options Trading Accelerator Workshop is valued at \$1,497.</p>
<div data-bbox="110 955 703 997" data-label="Section-Header"> <p>What You're Gonna Get...</p> </div> <div data-bbox="196 1018 228 1060" data-label="Image"> </div> <div data-bbox="248 1020 680 1050" data-label="Text"> <p>- Options Income Multiplier Advisory Service (2 years) Value: \$5,994</p> </div> <div data-bbox="190 1071 237 1113" data-label="Image"> </div> <div data-bbox="248 1073 680 1100" data-label="Text"> <p>- Options Trading Accelerator Workshop Value: \$1,497</p> </div> <div data-bbox="531 1134 680 1163" data-label="Text"> <p>Total Value: \$7,491</p> </div>	<p>So the combined value is about \$7500...</p> <p>But you won't have to pay that today. Because I want to make it easy for people who have smaller accounts to get in the game and start making money as quickly as possible with this.</p> <p>So I'll show you how to get access to all this for what equates to less than \$90 a month...</p>
<div data-bbox="298 1362 498 1415" data-label="Image"> </div> <div data-bbox="110 1430 703 1675" data-label="Image"> </div> <div data-bbox="237 1528 570 1575" data-label="Text"> <p>Strategy Sessions</p> </div>	<p>But first I want to let you know about the OIM Strategy Sessions that you'll also get if you sign up today.</p>

<p>OIM Strategy Sessions</p> <p>Answered most common questions from members:</p> 	<p>These were a series of 12 trainings I did specifically for OIM Advisory Members that answered specific questions people had about these trades, questions like:</p>
<p>OIM Strategy Sessions</p> <p>Answered most common questions from members:</p> <ul style="list-style-type: none"> • Are my entry trades good? 	<p>Are my entry trades good?</p>
<p>OIM Strategy Sessions</p> <p>Answered most common questions from members:</p> <ul style="list-style-type: none"> • Are my entry trades good? • Are my trade setups appropriate? 	<p>Are my trade setups appropriate?</p>
<p>OIM Strategy Sessions</p> <p>Answered most common questions from members:</p> <ul style="list-style-type: none"> • Are my entry trades good? • Are my trade setups appropriate? • What is my exit strategy? 	<p>What is my exit strategy?</p>

<div><div>OIM Strategy Sessions</div><div>Answered most common questions from members:</div><ul style="list-style-type: none">• Are my entry trades good?• Are my trade setups appropriate?• What is my exit strategy?• How can I get more profit out of each trade?<div></div></div>	How can I get more profit out of each trade?
<div><div>OIM Strategy Sessions</div><div>Answered most common questions from members:</div><ul style="list-style-type: none">• Are my entry trades good?• Are my trade setups appropriate?• What is my exit strategy?• How can I get more profit out of each trade?• How do different market conditions affect my trades?<div></div></div>	How do different market conditions affect my trades?
<div><div>OIM Strategy Sessions</div><div>Answered most common questions from members:</div><ul style="list-style-type: none">• Are my entry trades good?• Are my trade setups appropriate?• What is my exit strategy?• How can I get more profit out of each trade?• How do different market conditions affect my trades?<div></div><div>Value: \$2497</div></div>	The retail value for these strategy sessions is \$2,497...
<div><div>What You're Gonna Get...</div><div><div></div><div>- Options Income Multiplier Advisory Service (2 years) Value: \$5,994</div></div><div><div></div><div>- Options Trading Accelerator Workshop Value: \$1,497</div></div><div><div></div><div>- Options Income Multiplier Strategy Sessions Value: \$2,497</div></div><div>Total Value: \$ 9,988</div></div>	so if you add up everything the value of this program is about ten thousand dollars.

As part of this package, you're also going to get a bonus trading video with distinct focus on the three proven trade setups along with a corresponding checklist.

This is a really handy tool to have to make sure you're doing these trades right. What a lot of traders do is they'll get my OIM trade alert, watch the video on one screen, have their trading platform, like TradeStation or TOS on another screen and then pull out this checklist just as a way of double checking they're doing everything correctly. Ok, it's a very handy bonus, valued at \$397.

What You're Gonna Get...

- Options Income Multiplier Advisory Service (2 years) Value: \$5,994

So as you can see, this is a very comprehensive trading program. It has everything you need to hit the ground running and start taking trades as early as next week.

So just to recap, when you enroll today you'll get the options income multiplier advisory service for two years of live alerts, normally about six thousand dollars...

What You're Gonna Get...

- Options Income Multiplier Advisory Service (2 years) Value: \$5,994

- Options Trading Accelerator Workshop Value: \$1,497

The Options Trading Accelerator Workshop program, valued around fifteen hundred...

<p>What You're Gonna Get...</p> <ul style="list-style-type: none">  - Options Income Multiplier Advisory Service (2 years) Value: \$5,994  - Options Trading Accelerator Workshop Value: \$1,497  - Options Income Multiplier Strategy Sessions Value: \$2,497 	<p>The OIM Strategy Sessions (an entire year's worth), valued at \$2,497...</p>
<p>What You're Gonna Get...</p> <ul style="list-style-type: none">  - Options Income Multiplier Advisory Service (2 years) Value: \$5,994  - Options Trading Accelerator Workshop Value: \$1,497  - Options Income Multiplier Strategy Sessions Value: \$2,497  - 3 Proven Trades Video and Checklist Value: \$397 	<p>And the 3 Proven Trades Video and Checklist, valued at \$397.</p>
<p>What You're Gonna Get...</p> <ul style="list-style-type: none">  - Options Income Multiplier Advisory Service (2 years) Value: \$5,994  - Options Trading Accelerator Workshop Value: \$1,497  - Options Income Multiplier Strategy Sessions Value: \$2,497  - 3 Proven Trades Video and Checklist Value: \$397 <p>Total Value: \$10,385</p>	<p>So the total value of the entire program is \$10,385.</p>
<p>What You're Gonna Get...</p> <ul style="list-style-type: none">  - Options Income Multiplier Advisory Service (2 years) Value: \$5,994  - Options Trading Accelerator Workshop Value: \$1,497  - Options Income Multiplier Strategy Sessions Value: \$2,497  - 3 Proven Trades Video and Checklist Value: \$397 <p>Total Value: \$10,385 Special Offer! <u>\$1,997</u></p>	<p>But because you've watched this far, I'm going to give you a special offer of \$1,997 for this program... So you can save over \$8,000, which is pretty amazing considering that you're getting two years of live trade alerts for that amount.</p>

What You're Gonna Get...

- Options Income Multiplier Advisory Service (2 years) Value: \$5,994
- Options Trading Accelerator Workshop Value: \$1,497
- Options Income Multiplier Strategy Sessions Value: \$2,497
- 3 Proven Trades Video and Checklist Value: \$397

1 BILLING INFORMATION

First Name	<input type="text"/>
Last Name	<input type="text"/>
Email	<input type="text"/>
Street Address	<input type="text"/>
Street Address Line 2 (optional)	<input type="text"/>
City	<input type="text"/>

2 Full Years of the Options Income Multiplier Advisory Service (Total Value ~~\$5,994~~)

You'll receive a video email update with actionable trade alerts. On average, you'll receive at least one new recommendation a week. Some weeks there could be none. Other weeks there could be more, depending on the market.

And if you type that in, you'll come to the enrollment page here and you'll see the options income multiplier advisory service.

All you have to do is put in your billing information here, your billing address, and payment information and click submit and you'll instantly be enrolled in this program. You'll be receiving trades this week.

Plain text here...

Now \$1,997 in and of itself, compared to the value that you're getting, is well worth the expense, especially knowing you're getting over 200 option income multiplier trades... But maybe you're thinking: "Well, I'm still a little hesitant, \$1997 is a lot of money to put on the line."

Try It Risk-Free for 30 Days

Well, what we've done is we've also given you a 100% money back guarantee for 30 days. That means you can sign up right now and test drive this for the next 4 weeks. Take some trades and see for yourself how this works.

If you're not happy with the results after that then you can easily request a refund. All you would do is email us at

support@basecamptrading.com and request a refund. We'll issue it within 1 business day. No games or tricks. If you're not happy with everything you get you'll get your money back. But I highly doubt you're going to want a refund if you start making consistent income with this.

<p>What's ONE Good Trade Worth?</p> <hr/>  WWW.BCTNOW.COM/MULTIPLY	<p>Now, let's do some quick math here:</p> <p>What's ONE good OIM trade worth?</p>
<p>What's ONE Good Trade Worth?</p> <hr/> <p> 1 Trade = \$300 potential profit</p>  WWW.BCTNOW.COM/MULTIPLY	<p>Let's just say, in your first trade you made \$300 profit. Not a huge win but hey it's a profit. Now you might think, "Hey, this isn't too bad. Let me take 2 more trades."</p>
<p>What's ONE Good Trade Worth?</p> <hr/> <p> 1 Trade = \$300 potential profit x  3 Trades Per Week = \$900/week</p>  WWW.BCTNOW.COM/MULTIPLY	<p>You take a couple more winning trades that same week, because you're getting these alerts on a regular basis. Now you're looking at a \$900 profit in the first week.</p> <p>And remember, the cost for the 2-year program is \$1997. So \$900 pays off nearly half of it -- and that's just with 3 winning trades. So you say, "Okay, let me keep this up."</p>
<p>What's ONE Good Trade Worth?</p> <hr/> <p> 1 Trade = \$300 potential profit x  3 Trades Per Week = \$900/week</p> <p>\$900 x 52 Weeks = potential \$46,800+/year</p>  WWW.BCTNOW.COM/MULTIPLY 	<p>Even if you never scaled this... if you never even increased the number of contracts you traded and you just did one, maybe two contracts, every trade, and you just kept taking trades... and you did that for an entire year...</p> <p>After a year of making \$900 a week that would be \$46,800 per year you could potentially make.</p>

What's ONE Good Trade Worth?

1 Trade = \$300 potential profit
x
3 Trades Per Week = \$900/week

\$900 x 52 Weeks = potential **\$46,800+/year**

One Single Payment of \$1,997

X Options Income
MULTIPLIER

WWW.BCTNOW.COM/MULTIPLY

That's the type of return you could get on your investment.

And that's just one year. This program is a 2 year program. So all you do is keep trading. That is the power of taking high quality, regular trades.

This trade setup is not gimmicky. It's not based on, you know, the stars aligning or really huge option volume on some sort of insider trading. It's actually a very simple, but effective, way to generate consistent income from trading.

Now, all this is extremely fundamental. Here's the trade... Here's the breakout opportunity... Here's how to set up the structure the right way and implement the trade.

You don't have to think too hard about it because I'm sending you all the alerts already. They come out, you take the trade, you make the money. This is what the math looks like after a year.

Profit Ladder on TSLA - \$3,000 Profit

One reason why this trading system is so lucrative is because you have stocks like Tesla. Each of those blocks can profit anywhere from 650 to \$700 per contract.

Those are \$20-wide spreads. Amazon does this. Tesla does this. Apple does this. They're all not quite as profitable as Tesla, but they can still give you anywhere from \$200, \$300, \$500 per contract, that's the power of these trade alerts.

Now look at this... I want you to think about something for a second... Think about the decision to pull the trigger on this service like it's a potential trade...

Plain text here...

Because if you want to be a successful trader, the one thing you'll have to master is the emotional aspect of risking money.

And the offer in front of you right now is a great real life example... You can see the profit potential... but you also know there's an element of risk... but you have your "risk control" in place because of the money back guarantee.

So now you can just ask yourself:

Think About This...

Does this seem like a good trade?

Risk: \$1997

Downside: You waste some time but get 100% refund.

Upside: You potentially make \$3600+ a month

"Does this seem like a good trade? Risking" \$1997 to make 10 to 20 times that much?"

And I say "risking" -- but the truth is you're not really risking that because of the money back guarantee... So your real risk is spending some time taking the trades over the next few weeks and yes, tying up \$1997 for a few weeks while you test drive this.

So considering the facts, ask yourself: "Does this seem like a good trade?" If you say "Yes but you still can't bring yourself to pull the trigger out of fear then you have a choice: you can either confront that fear right now and decide you're going to be a trader... you're going to be profitable and you're not going to allow emotions to rule you anymore.

Or you can be honest with yourself and say: "You know what, trading is harder than I thought. I don't think I'm ready to do this yet." And that's ok. I'd rather you figure that out now then to sign up and then hesitate to make any of these trades out of fear. Does that sound fair?

What You're Gonna Get...

- Options Income Multiplier Advisory Service (2 years) Value: \$5,994

- Options Trading Accelerator Workshop Value: \$1,497

- Options Income Multiplier Strategy Sessions Value: \$2,497

- 3 Proven Trades Video and Checklist Value: \$397

Total Value: ~~\$10,385~~
